# On the Subject of Coordination

Want to see me index into the table?
Want to see me do it again?

- This module contains a 6x6 grid of buttons, one of which will be colored black.
- Using the coordinate displayed on the black square, index into the table in the manual to receive a coordinate.
- Using the coordinate received in the manual, index that into the module to receive another coordinate.
- Repeat this process until there is a spot that has been "landed on" in both the manual and the module. If a spot has been landed on before, move a space to the right, wrapping around if necessary.

	A	B	C	D	E	F
1	F4	A2	E2	D4	C5	E1
2	A3	F3	D1	C2	E6	D3
3	C3	E4	C4	B6	A6	B5
4	E3	C1	D6	B2	A1	E5
5	F1	F5	B1	B3	D5	C6
6	F6	D2	A4	B4	A5	F2
